THE ULTIMATE IN CONSERVATION MATTING

Crescent Conservation matboard is the right solution for your requirements if you are looking for a conservation matboard for the framing of fine art prints, limited editions, valuable documents and photographs.

The matboard is manufactured from 100% alpha cellulose, which is extracted from wood through a chemical process. The lignin is then removed almost completely by oxygen delignification. The residual lignin is buffered with calcium carbonate, which neutralises the lignin in the long term and causes an alkaline pH value of 8.0 - 8.5

The core of the boards varies according to aesthetic tastes. Each core colour is created through a specific process. Select boards are made of bleached cellulose and will therefore not discolour and yellow over time. Select Metals black core boards are made from pigmented cellulose.

Alpha Conservation Quality

All matboard cores in this specifier are 100% alpha cellulose conservation quality. No recycled material is used to ensure the safety of your customer's artwork permanently, acid-free and lignin-free for a lifetime of protection.

Bleed Resistant

The matboards are color-fast and will not transfer their color to other materials when exposed to water or humidity.

Aging Resistant

Complying with the standards DIN ISO 9706, all BETTER products can be considered aging resistant.

Fade Resistant

Surface papers made from quality pigments to provide optimum fade resistance.

pH Value

Buffered with calcium carbonate to an alkaline reserve of 3 - 5% pH 8.0 - 8.5.

FATG

Meets the quality standards as set by the Fine Art Trade Guild (FATG) – level 2.

EARTHCORES

NATURAL ELEGANCE, INSIDE AND OUT

- **Nature-Inspired Palette:** Colors derived from natural elements such as earth, stone, and greenery.
- **Simplicity and Elegance:** The tone-on-tone approach brings a subtle sophistication that blends seamlessly into your artwork.
- **Universal Appeal:** These tones complement different design styles, from rustic and bohemian to modern and minimalist.
- **Warm and Inviting:** Earth tones can transform any space into a warm and inviting sanctuary.
- **Timeless Appeal:** Earthy tones' longevity and classic nature ensure they stay relevant across seasons and trends.
